ASSURANCE STATEMENTS	
1.)	Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
2.)	Each principal investigator has considered alternatives to painful procedures.
3.)	This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
4.)	The attending veterinarian for this research facility has appropriate authority to ensure the provisions of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

CERTIFICATION BY HEADQUARTERS RESEARCH FACILITY OFFICIAL (Chief Executive Officer (C.E.O.) or Legally Responsible Institutional Official (I.O.)) I certify that the above is true, correct, and complete (7 U.S.C. Section 2143).

ASSURANCE STATEMENTS

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provisions of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ANNUAL REPORT OF RESEARCH FACILITY
(TYPE OR PRINT)

1. REGISTRATION NUMBER
72-R-0103

2. HEADQUARTERS RESEARCH FACILITY (Name, address, and telephone number as registered with USDA, include ZIP Code)

Baton Rouge Community College
201 Community College Drive

BATON ROUGE, LA 70806

3. REPORTING FACILITY (List all locations where animals were housed or used in actual research, testing, teaching, or experimentation, or held for these purposes. Attach additional sheets, if necessary.)

FACILITY LOCATIONS (Sites)

(b)(7)(F)

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets, if necessary, or use APHIS FORM 7023A.)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress on these animals and the reasons such drugs were not used must be attached to this report.)	F. TOTAL NUMBER OF ANIMALS (Cols. C + D + E)
4. Dogs	0	30	0	0	30
5. Cats	0	5	0	0	5
6. Guinea Pigs	0	0	0	0	0
7. Hamsters	0	0	0	0	0
8. Rabbits	0	0	0	0	0
9. Non-human Primates	0	0	0	0	0
10. Sheep	0	0	0	0	0
11. Pigs	0	0	0	0	0
12. Other Farm Animals					
13. Other Animals					

ASSURANCE STATEMENTS

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provisions of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

CERTIFICATION BY HEADQUARTERS RESEARCH FACILITY OFFICIAL
(Chief Executive Officer (C.E.O.) or Legally Responsible Institutional Official (I.O.))

I certify that the above is true, correct, and complete (7 U.S.C. Section 2143).

SIGNATURE OF C.E.O. OR I.O.

NAME AND TITLE OF C.E.O. OR I.O. (Type or Print)

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0579-0036. The time required to complete this information collection is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Column E Explanation

This form is intended as an aid to completing the Column E explanation. It is not an official form and its use is voluntary. Names, addresses, protocols, veterinary care programs, and the like, are not required as part of an explanation. A Column E explanation must be written so as to be understood by lay persons as well as scientists.

1. Registration Number: 72-R-0003
2. Number 2 of animals used in this study.
3. Species (common name) Guinea pig of animals used in the study.
4. Explain the procedure producing pain and/or distress.

Guinea pigs were used to study a vaccine to prevent Herpes simplex Type 1 and Type 2 infections. Depending on the stage of the study Guinea Pigs are infected before or after vaccination. Those infected after vaccination serve to determine if the vaccine can prevent infection. Those infected prior to vaccination serve to determine if the vaccine can prevent reactivation of the virus during latent infection. No drugs can be administered that might alter the course of infection which would confound interpretation of vaccine efficacy. Most animals infected do not show overt clinical signs. However, in the event animals demonstrate severe neurologic signs animals are humanely euthanatized. Death is not an endpoint in this study.

5. Provide scientific justification why pain and/or distress could not be relieved. State methods or means used to determine that pain and/or distress relief would interfere with test results. (For Federally mandated testing, see Item 6 below)

Clinical signs of disease, while mild, are a significant indicator of disease course. NSAIDs and other pain relieving medications would alter not only the clinical signs but would alter the course of disease viral spread and would thus impact the outcome of the vaccine studies. A strong vaccine titer does not always predict vaccine efficacy.

6. What, if any, federal regulations require this procedure? Cite the agency, the code of Federal Regulations (CFR) title number and the specific section number (e.g., APHIS, 9 CFR 113.102):

Agency _____ CFR _____

Attachment 4

Column E Explanation Form for Regulated Species

This form is intended as an aid to completing the Column E explanation. Names, addresses, protocols, veterinary care programs, and the like, are not required as part of an explanation. A Column E explanation must be written so as to be understood by lay persons as well as scientists.

1. Registration Number: 72-R-003
2. Number of animals used under Column E conditions in this study. 30
3. Species (common name) of animals used in this study. New Zealand White Rabbits
4. Explain the procedure producing pain and/or distress, including reason(s) for species selected.

Rabbits are used in this study focusing on enhancing regeneration of corneal nerves damaged after corneal surgery. In this study rabbits undergo an 8 mm corneal dissection to sever sensory nerves. The surgery is performed under ketamine/ xylazine, proparacaine anesthesia. Moxifloxacin ophthalmic drops are given after surgery for infection prophylaxis. Rabbits are used for because they are a good model for corneal wound healing studies and the principal investigator has extensive experience with this model.

5. Provide scientific justification why pain and/or distress could not be relieved. State methods or means used to determine that pain and/or distress relief would interfere with test results.

Ketamine/ xylazine and proparacaine are used intra-op for anesthesia and analgesia. Post op analgesics cannot be used because they will interfere with the action of the experimental drug in wound healing and nerve regeneration. The animals are checked twice daily and are also closely observed by the clinical veterinarian. Standard veterinary nursing care is provided, and if infection or excessive pain occurs the animal is treated or euthanized if necessary.

IACUC Approved Exceptions to the Animal Welfare Regulations and Standards

- 1. Title and Section of Animal Welfare regulations for which an ACUC-approved exception was granted:** Section 3.81 Environment enhancement to promote psychological well-being.

Description of and rationale for ACUC-approved exception: there are 5 IACUC approved conditions where animals have been housed singly:

- 1) Animals participating in vaccine studies, where model development requires infection or efficacy is tested by challenging with live virus or bacteria. The animals are singly housed for the duration of the infectious period. When animals have tested negative for the infectious agent, they may be returned to social housing.
- 2) Animals participating in vaccine studies using live attenuated virus. Animals are re-paired 24-48 hrs after vaccination, when no reaction is observed at the injection site.
- 3) Animals participating in pharmacokinetic studies which require urine sample over timed intervals are housed individually to allow urine to collect in a pan below the cage. Animals may return to social housing at the end of sample collection.
- 4) Animal behavior being observed for up to 6hrs after drug administration.
- 5) Animals identified as fecal donors will be singly housed to maintain pathogen status.

The single housing provided maintains visual, auditory, and olfactory contact with conspecifics, manipulanda, and food enrichment, as appropriate.

Species and number of animals affected by this exception: 12 Capuchin Monkeys, 106 Cynomolgus Monkeys, 181 African Green Monkeys, and 273 Rhesus Monkeys.
